Topics include: Introduction to ProbabilityMain EnvironmentalContagePermutationsCombinations Combinations vs. PermutationsProbability of Independent EventsProbability of Dependent Events Additional Topics covers the material that many students need help with, but that are usually not covered as their own topic in a text book. It teaches students about step functions, calculators, covers some of the common mistakes made by students in an Algebra 2 class and how to note and interpret roles in part direction. Topics include: Stepping Functions Using the Common Algebra Calculator II MistakesCircle Tic Tac Toe FunReal Numbers Real teaches the definition and properties of real numbers and how to analyze data using problems that apply every day life, such as those involving average, median, mode and percentiles. Topics include: • Introduction to real numbers • Data analysis •Properties of real numbers linear equations linear equations analyzes concepts related to the topic and provides a student with the help of solving problems of practice, including how to solve for a parameter and how to solve various problems of words found in many text books of Algebra 2 andFrom home.
